📍 Fishers, Indiana, USA

PROFESSIONAL SUMMARY:

- Distinguished content strategy and design leader with an 8.4-year career, recognized for orchestrating successful technical documentation projects across diverse domains such as procurement, supply chain, asset management, payments, finance, banking, electrical, electronics, and mining.
- I specialize in simplifying complex workflows, scaling content systems, and driving measurable improvements in usability and product performance.
- Adept at leading technical documentation teams to triumph, my expertise lies in crafting meticulous developer documentation, end-user guides, admin guides, installation guides, e-learning courses, what's new guides, REST API guides, In-app help, and SEO-friendly documentation for the support portal.
- Under my direction, our redesign of navigation, information architecture, and microcopy produced significant gains—reducing time-to-task, improving feature discoverability, and boosting perceived ease of use. I also achieved a substantial lift in upsell click rates by developing scalable content patterns and strengthening narrative alignment across product lines.
- Established communication and documentation strategies that ensured a smoother feature rollout for **2,000+ customers by 5%**.
- Conducted training sessions on the latest product releases across different customers.
- Skilled in talent acquisition, mentorship, and implementing competency frameworks for technical writing teams.
- Incorporated Generative AI into the documentation process and successfully reduced the time required for drafting, reviewing, and finalizing documentation.
- Guided strategy for 0-to-1 product launches, contributed patterns to design systems, and modernized documentation and in-product content for a rapidly evolving, multi-solution ecosystem. I have also overseen global content operations, ensuring consistent, high-quality delivery in **32 languages**.
- Identified bugs in the product, and gaps in existing documentation, and won rewards from the business unit.
- Strategically curated and executed tailored training sessions for writers, targeting unique knowledge gaps spanning domain expertise, tool proficiency, and procedural understanding.
- Fostered collaboration with cross-functional teams, including product management, engineering, UI/UX, and support, ensuring synchronized delivery of exceptional documentation.
- Reduced customer complaints by **50%**, consistently completed projects on time and within budget, and maintained customer satisfaction.

- Exposure to pre-sales writing and creating corporate presentations.

SKILLS:

- Python, C, Markdown, DITA, XML, DDLC, SDLC, Agile methodology, REST API documentation, Advanced grammar, Generative AI
- Ixiasoft DITA CCMS, Adobe FrameMaker, RoboHelp, MadcapFlare, InDesign, Photoshop, Illustrator, Adobe Acrobat, MindTouch, Schema ST4, X-Metal, Cloudberry, SnagIt, Camtasia, Visio, MS Office, Postman, Swagger
- Confluence, JIRA, Team Foundation Server (TFS), SharePoint, GitHub, Teamcenter

CERTIFICATIONS:

- Doc Lead Training
- Diploma in English Grammar
- Information Architecture
- GEN AI Tools
- UX Writing
- Cybersecurity
- How to Videos
- Interactive Graphics
- English Writing Program
- Continuous Delivery

WORK EXPERIENCE:

Content Strategy and Design Lead, [SAP LABS](#)

[11/2021 – 12/2024](#)

- At SAP, I established Content Design as a new function for SAP Business Network and led a global team supporting the world's largest B2B platform (3.6M companies, \$6T in annual transactions).
- Established communication and documentation strategies that ensured a smoother feature rollout for 2,000+ customers by 5%. Led initiatives to build AI-ready content workflows, leveraged prompt engineering and LLM-driven tools to scale documentation creation and review.
- Mentored a team of 10 global writers and standardized reporting templates across products.
- Spearheaded the creation and management of interactive online help pages, guided tours, user guides, API reference guides, video tutorials, and What's New guides for SAP Business Network products.
- Championed in integrating Generative AI into documentation practice and successfully reduced the time required for drafting, reviewing, and finalizing documentation.
- Meticulously assessed colleagues' content to ensure adherence to quality standards and guidelines, while actively promoting the adoption of SAP style guidelines.
- Simplified SAP Business Network documentation, creating a unified user experience by increasing product standards and compliance by [10%](#).
- Participated in crafting UX copy for innovative features within intricate cloud networking products, enhancing user experience, and facilitating seamless product interaction.
- Designed Interactive graphics for SAP Business Network Documentation.

- Collaborated effectively with members from product management, customer success, development, and quality control teams to guarantee the prompt delivery of top-notch content that meets the highest standards.
- Enhanced content strategy initiatives, integrated user feedback, adhered to best practices, recognized industry standards and adapted to evolving technological and domain requirements.
- As a devoted mentor, guided technical writers in honing their skills in product knowledge, tools, and industry domains.
- Actively contributed to the establishment and continuous improvement of documentation processes, style guides, and templates to ensure consistency and quality across all deliverables.

Senior Content Specialist, [FIS GLOBAL SOLUTIONS](#)

[08/2020 – 11/2021](#)

- Designed online help pages, API guides, user guides, and release notes for APEX Collateral & Global One.
- Updated the Application reference section and Ask the Expert section in the support portal.
- Created instructional videos and updated them in the support portal.
- Analysed the documentation gaps and updated the end-user documentation.
- Gathered information from the product, testing, development, support, and user experience design teams to understand the project requirements and translate them to technical specifications.
- Involved in recruitment, conducting assessments, evaluations, and interviews of candidates for technical writing projects.

Technical Documentation Manager, [Jiffy.AI](#)

[09/2019 – 08/2020](#)

- Designed and reviewed end-user, administrator, developer, installation, troubleshooting, and API guides from scratch for Jiffy.ai (An advanced automation product integrated with AI and ML).
- Designed architecture and hardware specifications documents.
- Created Release notes for hotfixes, major, and minor releases.
- Trained and mentored team members on technical writing processes and tools.
- Created online help pages for the support portal by doing hands-on product usage to understand the user's perspective.
- Analysed the daily tickets in JIRA from customers to understand the documentation gaps and update the troubleshooting guide, FAQs, and user guides, respectively.
- Prepared and presented metrics to track documentation quality regularly and prepared training plans as necessary to improve quality.
- Assigned time and resources to document deliverables, tracked and shared progress with all stakeholders.
- Tested and updated existing documentation for quality improvement.

- Reviewed and provided inputs on UI texts to improve intelligibility.
- Created instructional videos to resolve customer pain points.
- Involved in recruitment, conducting assessments, evaluations, and interviews of candidates for technical writing projects.
- Gathered information from the product, testing, development, support, and user experience design teams to understand the project requirements and translate them to technical specifications.

Senior Technical Writer, **FINASTRA**

12/2018 – 07/2019

- Developed and reviewed end-user, admin, developer, installation, and troubleshooting guides for Fusion Essence (A web-based product for banking and financial services).
- Led the transformation of legacy word content to DITA-based content during the DITA migration process, staying current with modern documentation practices.
- Worked on the user stories written by business analysts and designed the user guides and release notes according to the technical standards.
- Conducted Toastmasters' sessions for our department of writers and editors.
- Created and delivered the Release Notes with good quality and minimal guidance.
- Analysed functional and technical specifications provided in JIRA to understand its documentation requirements and delivered the documents on time for every sprint release.
- Worked with the product management team, and engineering team, and attended daily scrum meetings to understand the project requirements and translate them to technical specifications.

Content Designer and Architect, **EPIROC MINING INDIA LTD.**

10/2017 – 11/2018

- Developed content for Epiroc machinery and its control systems.
- Created and reviewed software, maintenance, operation, safety, control system, and service manuals.
- Created marketing documents using Adobe InDesign.
- Created documents for Standard Operating Procedures (SOPs).
- Created illustrations using Adobe Illustrator and Isodraw.
- Worked with the product management team, and engineering team, and attended daily scrum meetings to understand the project requirements and translate them to technical specifications.

Technical Documentation Engineer, **WIPRO TECHNOLOGIES**

08/2016 – 10/2017

- Developed and reviewed End-user, Developer, Admin, Installation, and Troubleshooting guides for NetOxygen (a web-based application for creating mortgages) and its back-end tools.
- Worked with clients, business analysts, and, developers to understand the project requirements and translated them to technical specifications.

- In addition to spearheading documentation efforts for my assigned projects, I proactively collaborated with other product teams to create and refine content that enriched their documentation landscape.
- Created documents from scratch and Word templates.
- Created and updated release notes.
- Analyzed functional and technical specifications provided in the Team Foundation Server and business requirement documents to understand documentation requirements.

EDUCATION & SPECIAL ACHIEVEMENTS:

- Graduated in Electrical and Electronics Engineering with First class from Vignan's Institute of Information and Technology, Visakhapatnam, Andhra Pradesh.
- Recognized by the client for completing the projects on time with good quality and received spot awards.
- Recognized twice in Winners Circle (Wipro) for Team coordination and Multi-tasking.
- Recognized by the management of SAP Labs and received monetary rewards & appreciation certificates.
- Organized International Conference on Electrical, Electronics, Signals, Communication, and Optimization (EESCO)-2015 held on 24th & 25th January 2015 with IEEE Record no:35593.
